Andre was an effective TA who really helped me learn how to do econ problems.

Andre Victor was a great TA, and definitely helped me understand both material covered in lecture, and new material. He also helped foster my interest in economics, a course not in my major, and was a part of why I am choosing to take further economics courses next semester.

Andre was an amazing TA!

Andre was very effective. Whenever we were confused on a subject during recitation, he would follow up with emails after class. Awesome job!

Andre Victor was especially great in office hours. He is a great teacher, definitely shines one-on-one.

I found this course effective. By being introduced to topics in lecture, and further investigating them through recitation and independent readings of the text, I developed a basic understanding of micro-economics.

I thought that the recitation section was very helpful in explaining how to use the concepts we learned in class to solve problem sets. It was an great complement to the lecture and Andre was an excellent TA.

Great TA. He was very friendly and demonstrated great passion for the course material.

There was definitely a jump between lecture problems and recitation problems, but the recitation questions were particularly helpful come test time. Andre was very nice and effectively communicated concepts, but sometimes got carried away with more mathematical explanations that everyone clearly got lost in. Otherwise, he was accessible and helpful in and out of recitation and was a wonderful TA.

Andre's receptions were more valuable than the professor's lectures to me. He was a fantastic TA that made that last Friday class as interesting as possible.

It was interesting.

Good TA.

In my opinion, I thought Andre was the best TA out of all the econ TA's. Because of scheduling issues, I've been to other TA's recitations before, and I definitely felt that Andre did the best in his explanations and knew the right ways to phrase the concepts so I could understand.

In the beginning of the semester, I had surgery and was not able to catch up on any work fast enough, but he was very lenient and understanding of the struggle. He was able to help me catch up in my work and improve throughout the course. He also communicated with me effectively, responded to emails very quickly, and is just an excellent TA overall.

Overall, this course was very challenging. The material was not taught well and I wish that there were more homework problems that were like the problems tested on the exam. The lectures were also very confusing.

Good course
